1. REPORT HIGHLIGHTS

1.1 ADMINISTRATION

In 1997-98 the Correctional Services Division was staffed by a total of 513.8 full time equivalent positions, with 25.8% being devoted to Young Offender Programs.

1.2 ADMISSIONS

The Young Offender Programs had a 3.2% decrease in their overall admissions. Open custody experienced a decrease in admissions (28.3%) while secure custody experienced a 3.8% decrease in admissions. Community Based admissions increased by 4.4%, while the Alternative Measures Program experienced a decrease of 3.9%.

1.3 ALTERNATIVE MEASURES

In 1997-98, 718 young offenders were admitted to Alternative Measures. This represents a 3.9% decrease from the previous fiscal year. The profile of a youth who signed an Alternative Measures Agreement in 1997-98 was a fifteen year old male with a grade nine education, charged with a property related offence.

1.4 REMANDS

The number of youths remanded to secure custody decreased by 1.0% in 1997-98 (380) compared to 1996-97 (384).

1.5 PRE-DISPOSITIONAL REPORTS

Based on the information received from Community Services, there was a 7.2% decrease in the number of reports prepared by Youth Workers in 1997-98 (1030).

1.6 COMMUNITY BASED PROGRAMS

Admissions to the Community Based Programs increased 4.4% in 1997-98. The profile of a young offender sentenced to a community-based disposition during 1997-98 was a sixteen year old male with a grade nine education, given a sentence length of nine months for a property related offence.

1.7 CASELOAD

The average young offender caseload decreased by 1.4% compared to 1996-97. The table on page 26 was added in 1991-92 in order to have a consistent base for comparison between adult and young offender probation caseload. The objective of this table is to bring all cases to adult caseload equivalency. **The table is based on the premise that an average caseload dedicated to young offenders requires a higher degree of probation supervision than an average caseload of adult offenders.** Therefore, the work involved in supervision of one young offender would equal the work for 1.81 adults. Based on this factor, the average young offender caseload per office was adjusted to an adult equivalency caseload. This table provides only a comparable indicator of caseload statistics based on adult equivalency between offices, and **does not provide a complete workload measurement**.

1.8 COMMUNITY SERVICE ORDER PROGRAM

There was a 12.4% increase in the number of community service orders given during the 1997-98 fiscal year.

1.9 SECURE CUSTODY

Statistics on secure custody admissions for open custody violations are produced separately from other secure custody admissions because the YOAIS deals with them as transfers from one facility to another, not as new admissions. The number of secure custody admissions for open custody violations can be found in the tables with the VIO prefix. The total of 658 secure custody admissions was obtained by adding the 111 open custody violations to the 547 total for other types of secure custody admissions. This total is only an estimated total of secure custody admissions since a youth admitted to secure custody for an open custody violation, and subsequently committed to secure custody after his/her court appearance (with no break in time) is double counted.

The 658 admissions in 1997-98 represent a 3.8% decrease compared to the 684 secure custody admissions in 1996-97. The annual average daily count of 87 represents an decrease of 7.4% compared with 1996-97 (94).

The profile of a young offender under sentence in secure custody during 1997-98 was a sixteen year old male with a history of previous offence(s), a grade eight education, given a sentence length of six months for a property related offence. The average time served under sentence in secure custody of all released in 1997-98 is 91 days.

1.10 OPEN CUSTODY

The open custody facilities experienced a 28.37% decrease in admissions. The annual average daily count of 79 for 1997-98 represents a 27.5% decrease compared to 109 for 1996-97.

The profile of a young offender sentenced to open custody during 1997-98 was a sixteen year old male with a grade eight education, given a sentence length of 5 months for a property related offence. The average time served in open custody of all cases released during 1997-98 was 148 days.

1.11 OPEN CUSTODY VIOLATIONS

The number of admissions to secure custody for open custody violations (111) decreased by 11.2% compared to 1996-97 (125).

1.12 DISPOSITION REVIEWS

One-hundred-forty-eight young offenders appeared in Youth Court giving a total of 464 dispostions reviewed. Two-hundred and seventy-three of these dispositions were varied.

The 1990-91 Young Offender Services Annual Report was the first report produced with YSS. Although the initial intent was to maintain the type of young offender data previously gathered with the manual system, some areas were significantly affected by the changes in data collection with an on-line operational information system. The statistics produced for the 1990-91 fiscal year with the YSS software package **should not be compared** to previous years because of changes in the data definitions with automation.

TOTAL	1,175	2,127	2,687	4,814	42	10	52	93

This table was added to the 1991-92 report in order to have a point of comparison between offices due to the administrative arrangements where some Probation Officers carry mixed adult and young offender cases. The objective of this table is to bring all cases to adult equivalency status. **The table is based on the premise that an average caseload dedicated to young offenders is more demanding of time than an average caseload of adult offenders.** Within the cost sharing negotiations in 1989-90, the federal government accepted this premise. Based on the average caseload dedicated to young offenders and the average caseload of adult offenders, both the provincial and federal governments agreed that the work involved in managing one young offender case would equal the work of 1.81 adult cases. Futhermore, both governments agreed to utilize this 1.81 factor for a period of five years.

Based on this 1.81 factor, the 1997-98 average young offender caseload per office was adjusted to an adult equivalency caseload. This figure was subsequently combined with the 1997-98 average adult caseload per office. The last column indicates the total combined adult/young offender caseload in an adult equivalency value. This table provides only a comparable indicator of probation caseload statistics based on adult equivalency between offices, and **does not provide a complete workload measurement** (excludes workload on report preparation, community assessments, Temporary Absences/Release supervision, open custody cases, secure custody cases, YOA reviews preparation, Community Based Programs, Alternative Measures, etc.).

Note: In 1997-98, Moncton, Fredericton, and Bouctouche had Probation Officer(s)/Youth Worker(s) dedicated to the supervision of young offenders. Saint John had 3 Probation Officer(s) dedicated to the supervision of only young offenders and 8 Probation Officer(s) carrying a mixed adult/young offender caseload. The number of Probation Officers in Grand Falls includes the position dedicated to Tobique.
